

Critical Reflection : Week 3 : Task B

My only struggle this week was visualising AVL Tree's rotation concept. Even though I was able to code it so it worked (thanks to the pseudo code provided) - I wasn't confident I understood it very well. That was where I discovered this [AVL Tree Visualization](#) Resource that helped immensely. Although this didn't change my code even slightly I was much more confident in the concept of rotation and my understanding of AVL trees.
